3. CONTENT AND ACHIEVED RESULTS

Brief Project Description

The DL@WEB project was aimed at improving the quality and relevance of distance learning in higher education institutions in the Western Balkans and facilitating their integration into the European Higher Education Area. The project covered the institutional, pedagogical and technological aspects of distance learning. The contribution included business analysis and process modelling, participation in the development of the pedagogical approach and delivery of training. Through these activities, the project supported the modernisation of teaching practices and the development of institutional capacities for quality distance education.

Key Results / Outputs

Business analysis and process models; pedagogical approach for distance learning; training; development of institutional capacities.
