Production of 40 fully prepared digital educational television programmes on Edubuntu for broadcasting through national television services.

3. CONTENT AND ACHIEVED RESULTS

Brief Project Description

Edubuntu on TV was a project funded by the Ministry of Information Society of the Republic of Macedonia. The project focused on the production of educational television programmes on Edubuntu, intended for broadcasting through national television services. A total of 40 fully prepared digital educational TV programmes were produced within the project. The project combined educational technology, multimedia content development and mass media in order to make practical knowledge about Edubuntu and digital learning tools available to a wider audience. The engagement included authoring and consulting activities related to the preparation of educational content and its adaptation for television broadcasting.

Key Results / Outputs

40 fully prepared digital educational television programmes on Edubuntu for national broadcasting.

Publications / DOI / Other Relevant Scientific Results
